Presidential Inauguration, Washington D.C.

President-Elect Donald Trump will be sworn into office as the 45th President of the United States. Numerous opponents of Donald Trump's presidency have planned several nationwide large-scale demonstrations aimed at disrupting the 45th Presidential Inauguration ceremony.

Cal OES Coastal Region

- Cal OES Law Enforcement Branch will have Assistant Chiefs in the San Francisco PD Department Operations Center (DOC) and the Oakland EOC today and tomorrow for region wide protest activity.

Cal OES Southern Region

- Numerous sources have revealed multiple protests are expected to occur throughout Downtown Los Angeles, between Thursday, 01/19/17 and Sunday, 01/22/17.
- Intelligence sources estimate approximately 150,000 people will be demonstrating over the course of the four day period in the Downtown area. While this area falls under the jurisdiction of the Los Angeles Police Department (LAPD), the Los Angeles County Sheriff's Department (LASD) is responsible for providing policing services for several key structures in that area.
- Law enforcement services for these county buildings will be under the jurisdiction of the Los Angeles County Sheriff's Department with building protection to be provided by LASD personnel. Exterior streets and sidewalks will remain under the jurisdiction of the Los Angeles Police Department (LAPD).
- The Emergency Operations Bureau has met with all involved County Bureaus and the LAPD to coordinate all resources used for both the protection of county structures and possible mutual aid request from Operational Area partners.

6 Day Precipitation Forecast

Valid Thursday, January 19, 2017 – Tuesday, January 24, 2017.

WEATHER SYNOPSIS BY REGION

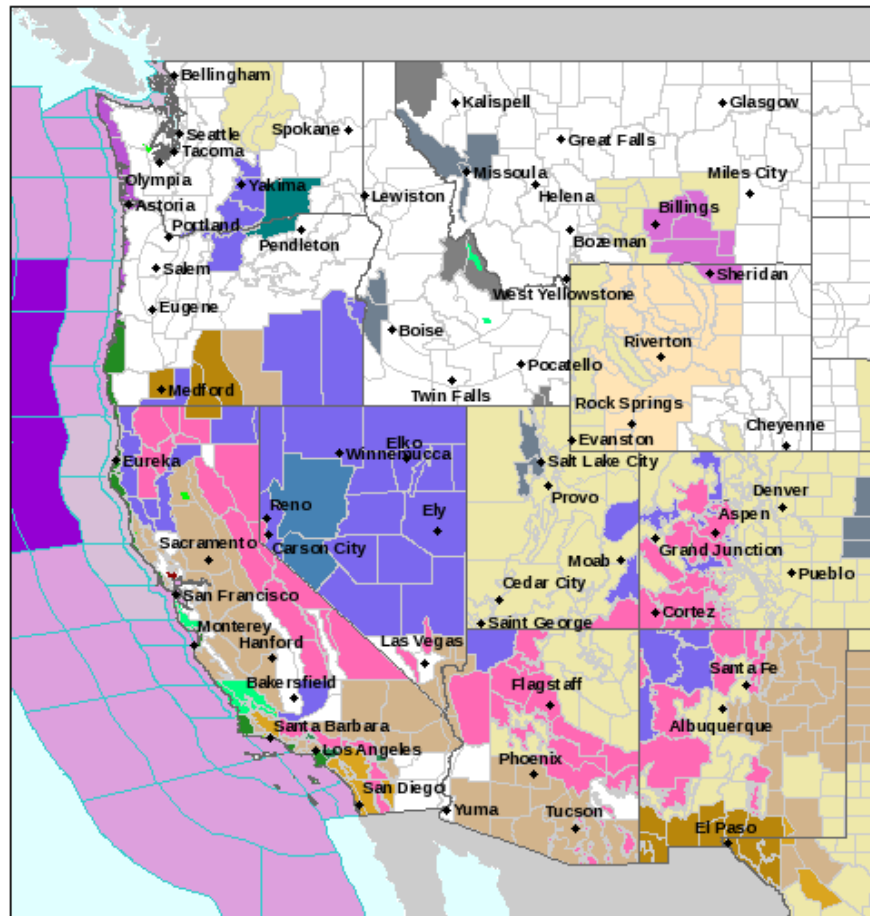

NORTHERN CALIFORNIA

Cool, wet, unstable conditions remain in place this morning and widespread showers can be expected in the mountains. The next storm will arrive early today with southerly gusts 30-50 mph and snow levels near 4000-5000 feet in moderate to heavy precipitations. Snow levels will drop Friday afternoon to 2500-4000 feet once the front moves through. Scattered showers will continue Saturday in the colder air mass. The third storm will move arrive early Sunday with moderate to heavy precipitation. Southerly gusts may reach 40-60 mph and snow levels will start out around 4000-6000 feet. Once the cold front moves through Sunday afternoon snow levels will drop to 3000-5000 feet. Monday will be another day with scattered showers and snow levels near 2000-3000 feet. The final showers will end early Tuesday. The problem of soft, saturated soils will continue to make downed trees possible. Area water courses will again run rather high as well. At this time it looks like a stretch of mild and dry weather with occasional offshore winds will begin by late Tuesday and last until early February.

SOUTHERN CALIFORNIA

This next storm will bring periods of heavy rain today. Isolated showers will occur Saturday before the last in this series of storms affects the area Sunday and Monday with periods of heavy rain. The back side of this last storm will bring scattered showers to most of Southern California Tuesday. An additional 5 to 10 inches of rainfall will occur across the foothills and mountains and 2 to 5 additional inches of rainfall will occur across the coast and valleys. The snow level will remain mainly between 4,000 and 5,000 feet through early next week. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas through Monday night. Temperatures will be around 10 degrees below normal through early next week, with mid 30s to mid 40s across the mountains and upper 40s and 50s in the valleys. A ridge of high pressure will build into California from the Pacific Ocean bringing a warming and drying trend starting Wednesday. There will also be periods of strong and gusty offshore winds across the mountains and below the canyons and passes of Southern California starting Wednesday morning.
